Real World Data & Poly Function Shapes

1. linear $y = ax + b$.  
2. quadratic $y = ax^2 + bx + c$.  
3. cubic $y = ax^3 + bx^2 + cx + d$.  
4. quartic

Waste Problem.

Lesson Objective. Solve problems involving surface area and volume of prisms. jgl Solve word problems about the volume of rectangular prisms. A rectangular... Assign variables to quantities in the problem so that you can answer the question using these variables. Derive mathematical equations containing these. The following pictures are examples of parabolas in the real world. Projectile motion, suspension bridges, a[...]
