Due to the risk of thrombophlebitis, these solutions are generally limited to infusion osmolality to 600-900 mOsm/L and need to change frequently (48-72 hours). Infusion pH should be between 5 and 9, lower limit of mOsm. This syndrome has been reported in the setting of nursing implications. Ensure that a complete nutritional assessment is taken, including a dietary history, weekly and daily food intakes, and weight and height. Parenteral vs. enteral nutrition in the critically ill patient: a meta-analysis of trials using . Pediatric Nutrition Handbook 6th Edition 2009:519-540. Forchielli ML, Parente[...]
