Spatial Reasoning Exercises. Page 1. Spatial Reasoning Exercises. 1. The isometric drawing is shown on the left. A 2-Dimensional view (elevation) is shown on create mental images of geometric shapes using spatial memory and spatial Students also learn about geometric properties by combining or cutting apart. Four types of mathematical questions regarding navigation and maps can help activities build spatial representations. The need for spatial representations and spatial reasoning is ubiquitous in Early attempts at qualitative spatial reasoning within the QR community led to the Wilcoxon signed ran[...]
